EDUCATION

University of Oxford *DPhil. Mathematics*

Oxford, UK

Sep 2018 – Present

- o Topic: Role Extraction in Bipartite Networks (our industrial partner is Tesco).
- o Supervisor: Prof. Renaud Lambiotte.

University of Manchester

Manchester, UK

BSc. Mathematics and Statistics (2 + 2 Dual Degree)

Sep 2016 – Jun 2018

- First Class Hons.
- o Final Project: Gaussian Processes for Machine Learning, supervised by Prof Thomas House.

Beijing Institute of Technology

Beijing, China

BSc. Mathematics (2 + 2 Dual Degree)

Sep 2014 – Jun 2016

o GPA 3.79/4.

HONOURS AND AWARDS

- EPSRC InFoMM CDT Studentship (fully-funded PhD studentship, 2018 2022)
- o First Prize in China Undergraduate Mathematical Contest in Modelling (Beijing, 09/2016 & 09/2015)
- o First-Class People's Scholarship (5% in academia, 2014-2016)
- o National Scholarship (5% in academic, research and other activities, 2014-2015)

RESEARCH EXPERIENCES

University of Oxford

Oxford, UK

Supervisor: Prof. Raphael Hauser. Company: Air Products

July - Sep. 2019

Inter-District Packaged Gas Optimisation

- Formulated the problem of both inventory management and transshipment of products as a mixed integer programming, and reviewed state-of-the-art techniques.
- o Proposed several relaxation methods based on Lagrangian relaxation to improve solving efficiency.

Supervisor: Prof. Renaud Lambiotte. Company: Tesco

Apr.- June 2019

Halo Effect and Demand Transfer on a Small Range of Products

- Devised a method combining Poisson processes with time series analysis to identify the product relationships from aggregated sales data quantitatively.
- o Applied regression techniques, and proposed several validation methods on real data.

European Study Group with Industry 145

Cambridge, UK

Company: Defence Science and Technology Laboratory (DSTL)

Apr. 2019

Deep Learning (DL) Hardening Techniques for Image Classifier

 Investigated and developed well-known DL defense ideas to classic attacks, including preprocessing, universal adversarial training, and generative adversarial networks (GAN).

University of Manchester

Manchester, UK

Supervisor: Prof. Thomas House

Feb. - Jun. 2018

Model Selection versus Model Averaging in Gaussian Processes

- Proposed to apply model averaging technique to the parameter estimation phase, and achieved it though Monte Carlo method.
- o Compared this overall method with the classical model selection in real data (code in Python).

INVITED/CONTRIBUTED TALKS

- o Contributed Talk Conference on Complex Systems (CCS), Lyon, France. (Oct. 2021)
- o InFoMM Annual Meeting (Virtual), University of Oxford, UK. (July 2021)
- o Oxford Network Seminar (Virtual), University of Oxford, UK. (May 2021)
- o InFoMM Group Meeting (Virtual), University of Oxford, UK. (Apr. 2021)

TEACHING EXPERIENCES

University of Oxford

Oxford, UK

Teaching Assistant

Sep. 2019 - Apr. 2020

- o C5.4 Networks, Hilary Term 2020
- o B8.5 Graph Theory, Michaelmas Tern 2019

SKILLS

- IT skills: Proficiency in Python (pandas, numpy, scipy, networkx, statsmodels, scikit-learn),
 MATLAB, LaTeX, git; Familiarity with R Language, C Language, MOSEK, Lingo.
- Languages: Chinese (native), English (fluent).
- Interests: Cycling, Volleyball, Basketball, Football.
- Music: Guzheng.

PUBLICATIONS AND REPORTS

Publications

• Y. Tian, Sebastian Lautz, Alisdair Wallis and Renaud Lambiotte. Extracting complements and substitutes from sales data: a network perspective. Accepted, EPJ Data Science, 2021.

Technical Reports

- S. Abrahams, R. Ali, A. Berryman, N. Aishah Hamzah, T. Khang, C. Ng, Y. Tian, H. Yang. Estimating Customer Lifetime Value (CLV) in the Gaming Industry Using Incomplete Data. Report for European Study Group with Industry 162, Leeds, UK, 2020.
- M. Benning, L. Bonthrone, T. Carr, J. Dyer, A. Malip, M. McGuigan, A. Puiu, Y. Tian, A. Wendland and L. Yang. *Identifying potential hardening techniques for image classifiers*. Report for European Study Group with Industry 145, Cambridge, UK, 2019.
